

Quality Tools for Smart Cleaning

PRESS RELEASE

Unger wins Innovation Award

Unger Stingray shines all around

Solingen/Chicago – Unger was presented with the Innovation Award at the international cleaning trade fair ISSA/Interclean North America.

The Unger Stingray indoor window cleaning system managed to impress the exclusive jury and won the coveted award in the Supplies and Accessories category.

With a total of 50 cleaning companies registering their products for the Innovation Awards this year, the competition was challenging across all categories. A distinguished expert jury made up of distributors, construction companies and in-house service providers judged every product on its forward-thinking potential, giving particular consideration to profitability and safety aspects, as well as innovative features, quality and productivity.

The jury chose Unger Stingray as the outstanding innovation in the Supplies and Accessories category based on its unique advantages that make cleaning indoor glass, mirror and other washable surfaces simpler and more efficient.

Unger Stingray – allowing cleaning personnel to work simpler, faster, safer and more efficiently

Cleaning indoor glass using traditional sprayer and a cloth can be time-consuming and labour intensive, especially in areas with lots of internal glass surfaces that have to be kept spotless at all times, such as offices, hotels, restaurants and shopping centres. Using ladders or climbing chairs to clean at height can also be risky and require re-arranging furniture and equipment for access.

Unger Stingray easily solves these issues and offers a perfect solution to all your indoor glass cleaning needs.

Quality Tools for Smart Cleaning

According to the “Indoor window cleaning time and consumption study” conducted by the hygiene consultant Hyco Mück, the Stingray allows you to clean 25% faster compared to traditional sprayer and a cloth method thanks to its one step “apply & clean” design. Its enclosed sprayer applies the glass cleaner directly to surface, eliminating overspray and drips, so there is no risk of airborne chemical inhalation and no need to spend extra time on covering up nearby items or cleaning up the mess.

At a push of a button, the Stingray pump dispenses a single shot of professional glass cleaner with 3M Scotchgard protection, its precise application allows you to clean brilliantly, control costs and minimise waste, using 39% less chemicals!

With its highly intuitive design, the Stingray is simple and easy to use, with minimal training required even for your least experienced staff. This means that surface cleaning at heights of up to 4 m (13 ft) can now be safely carried out by in-house teams on a daily basis, reducing risks and costs whilst increasing building cleanliness and customer satisfaction.

About UNGER

UNGER is a leading international manufacturer of professional cleaning and maintenance tools. All UNGER systems are designed to make cleaning work efficient, ergonomic, and thorough. The portfolio includes professional pure water cleaning systems, a comprehensive range of glass cleaning products, floor cleaning, and maintenance systems, a colour-coded surface cleaning system, and a cleaning system for sanitary rooms. In addition to the high quality requirements and innovative product development, UNGER offers outstanding customer service. The headquarters of the company founded in Hamburg in 1964 are in Solingen, Germany and Bridgeport, Connecticut. The growing global business is driven by distributors in over 80 countries.
