

Quality Tools for Smart Cleaning

PRESS RELEASE

Plus X Award awards erGO! clean from UNGER with four seals of approval

The erGO! clean has now been awarded four seals of approval at the Plus X Award. In the categories High Quality, Ease of Use, Functionality and Ergonomics, the innovative floor cleaning system convinced the top-class jury of industry experts, designers and trade editors. "This decision confirms our high standards of quality and the always customer-oriented focus of our products", says a delighted Dietmar Bernstein, Director Product Management at UNGER.

High Quality

In particular, the lifespan and useful life of the erGO! clean encouraged the jury to award the High Quality seal. Because from the handle to the mop, UNGER relies on high-quality materials. The floor mop with the latest microfibre technology is available as a Velcro or pocket mop and combines high water absorption with excellent gliding performance. Its workmanship makes the product a durable tool.

Ease of use & ergonomics

The jury also highlighted the ease of use and ergonomics of the cleaning system as a further plus point: The S-shaped handle with its curvature supports the cleaning force in its wiping movements. The telescopic function of the handle meets the individual needs of every cleaner. With lengths from 1.30 m to 1.70 m, everyone can easily adapt it to their body size. "This is back and joint-friendly," was also the jury's verdict.

Functionality

The erGO! clean also scored in terms of functionality. The product has a removable tank, optionally with 500 ml and 1000 ml capacity, which can be quickly replaced if necessary. The set-up time for daily cleaning is thus almost completely eliminated, as is the transport of heavy water buckets. A pulse-jet system, which can be operated reliably at any time thanks to a fatigue-free dosing lever, ensures that the cleaning fluid is dosed exactly as required.
