

Quality Tools for Smart Cleaning

PRESS RELEASE

A new era in pure water cleaning:

The new nLITE® PowerPad – sensationally fast, effective and easy

The new nLITE® PowerPad from the quality brand UNGER ushers in a new era in pure water cleaning for large glass surfaces on the ground floor. The nLITE® PowerPad impresses with its innovative microfibre cleaning pad with a maximum contact surface to the glass surface, the 360° swivel, which ensures permanent contact to the surface, and the rinse bar. Faster dirt removal is guaranteed, leaving you with perfect cleaning results. Once again, the market leader is starting a real revolution here!

Microfibre cleaning pad with maximum surface contact

The nLITE® PowerPad's highly effective microfibre cleaning pad removes dirt better and faster, as it provides a much larger contact area on the surface than the bristles of a conventional water-fed brush. The integrated rinse bar constantly provides pure water over the entire width of the pad via special nozzles, thereby resulting in a self-cleaning effect. What's more, the durable microfibre glides easily over the glass surface.

The 360° swivel maintains contact even with lateral cleaning

Whether to the left, right, up or down: the nLITE® PowerPad offers maximum mobility thanks to the 360° swivel. It maintains permanent contact with the surface being cleaned in every working position, making lateral cleaning easier and more efficient. The swivel feature can also be locked in seven positions using the swivel lock. This guarantees the best cleaning results.

Perfect cleaning results quickly thanks to simple and intuitive handling

Since it requires a similar movement to traditional window cleaning, perfect cleaning results can be achieved with pure water cleaning using the nLITE® PowerPad without a long familiarisation period.

Furthermore, the new nLITE® PowerPad is compatible with the nLITE® water-fed pole system and the OptiLoc telescopic poles from the UNGER professional brand. The nLITE® PowerPad, which UNGER is presenting for the first time at the CMS, is available in 35 and 45-centimetre widths.

Quality Tools for Smart Cleaning

It is ideal for those already won over by pure water cleaning – as well as for those who are just discovering pure water technology for themselves.

The expert jury at the Purus Innovation Awards has also already acknowledged the nLITE® PowerPad by selecting the nLITE® PowerPad 2023 as one of the three finalists in the “Equipment” category.
